TexAMS

TexAms ERP should no longer be a luxury only for large corporations

## About Us

**Media • Web • ERP • E-commerce • SEO**

Ours is a simple philosophy right from the word go: Quality above everything else. And that is why all our services have the same end result: Happy Customers.

We Artistically design IT solutions. That's how we derive our name "Jingle InfoSolutions Pvt Ltd." ... meaning soothing musical approach to our customer's day to day operational issues resulting in ***enhanced efficiency/ productivity management tools....***

with our ***core management team's cumulative market experience, understanding and analysis of 45+ man-years***, we in our last 10 yr+ of existence have found domain of textile industry 's intricate process involving Textile products like Yarn, Woven Fabric, Knitted Fabric, Yarn Dying, Fabric Dying, Printing, Made ups, Home Furnishing etc... which is dynamic and complicated and by and large dearth of any fool-proof IT/Automated Process... resulting in lots of wastage and thefts under the nose of management leading to high overheads and low profitability...

## **Our Services**

### **Media • Web • ERP • E-commerce • SEO**

Media : - Interactive Media and Video Services.

Web :- Design & Development, Internet Marketing and Web Products

ERP :- Textile Industries ERP, Rice Mill Industries ERP and General ERP

### **Interactive Media and Video Services**

Corporate Presentations

PowerPoint Presentations

Responsive Websites

E-Commerce Websites

Custom Web Applications and Mobile Apps

### **Internet Marketing**

Search Engine Optimization

Social Media Optimization and Paid Marketing

### **ERP**

Textile Industries ERP

Rice Mill Industries ERP and Trading ERP

## Textile Industry Overview

India have close to 35000 nos of textile units spread all across, with mostly family held businesses and minimum IT monitoring for manufacturing processes. This is high on capital and labour intensive Textile and Apparel Industry which is different from other manufacturing industries in a number of important respects:

- 1. One-to-many processing** - Most manufacturing systems process a large number of components into a small number of end products. Textile enterprises use a small number of raw materials to create a multitude of products.
- 2. Process complexity and variety**- Textile products undergo a wide range of highly specialized processes. Production flows may branch and re-unite. Each process, from spinning to final garment making, has a unique set of production parameters: Spinning, Knitting, Weaving, Home furnishing, Yarn Dyeing, Fabric Dyeing, weave patterns, dye recipes, print design.

## Textile Industry Overview

3. **Long lead times**- There are relative long lead times between purchasing raw material and delivering finished product to a customer. This creates the need for careful inventory management and forecasting.
4. **Non-synchronized production lines**- The machines in a production sequence may have very different cycle times which vary between products. Correct modeling of this process is essential to efficient management of queuing and buffer stocks.
5. **A multitude of units**- There is no clear-cut concept of a unit of product. A wide variety of handling units and groupings must be managed, from rolls and cases to pallets and sets.
6. **Garment variety**- The wide variety of colors and sizes for a single model requires the use of a size matrix for order entry, purchase order and production. Seasonal and collection-based production requires a unique management approach.

## What is TexAms ERP ?

**TexAMS** is specially designed ERP covering entire process of Textile industry through which not only we **can reduce wastage by 50%** but at the same time **increase the productivity by almost 100%** over 2 year duration....our ERP solution is getting acceptability, credibility and ever growing market base not only in India but overseas as well...

## Benefits of TexAms ERP Solution: -----

No Client Installation = Easy Remote Maintenance

Platform & Device Dependent = Scalability

Time and Location free = Access from Anywhere

E-Business Ready = Customers, Employees, Supplier

Easy to Use = Everybody knows browsers & Internet

## Our Strength

our strength is future proof scalability and universal approach... our database platform is "oracle" with ".net" as front-end... we have since then diversified across industry segment like education, financial institutions, real estate over cloud computing... completing the entire bouquet of ENTERPRISE SUPPLY CHAIN MANAGEMENT on Hybrid Clouds...our core technical team is challenging itself to be in the forefront of continuously evolving software development as cutting edge technology ....be it screen convergence, internet ready, remote access, video streaming, mobile apps etc....
