About Us

Tick , a boom to SME, was born out of 22 years' experience into full featured ERP which was being implemented into medium and Small sized Manufacturing enterprises by our parent company. Most of these clients were opting accounting by most popular Software like Tally and Busy but willing to implement ERP in other segments like Production Management, Inventory Management, Order Management ,Procurement Management, Quality Control, Waste and rejection watch, etc.

To implement ERP without accounting feature was a challenge for them. Another challenge before SME were long and costly implementation of market available ERP, and adoption of ERP due to complicated configuration of ERP.

Tick Softwares Limited, specially incorporated to cater SME , rolled out Tick , as a product, exclusively for those SME which are using some accounting software but wish to automate other operations of their works. Tick can be connected with any Accounting Software. Its feature covers entire functionality of any manufacturing operations except accounting. It is standard ready to use software product which can be made functional within few hours.

Tick can be perceived as India's one and only Production ERP with lowest cost, lowest implementation time , lowest pay back period and highest feature in its segment.

Tick is such a product which you can not resist to use for your manufacturing operation.

Why Choose Us?

We provide you with optimal enterprise solutions that addresses your specific needs, for tick values the uniqueness of your business.

Vision

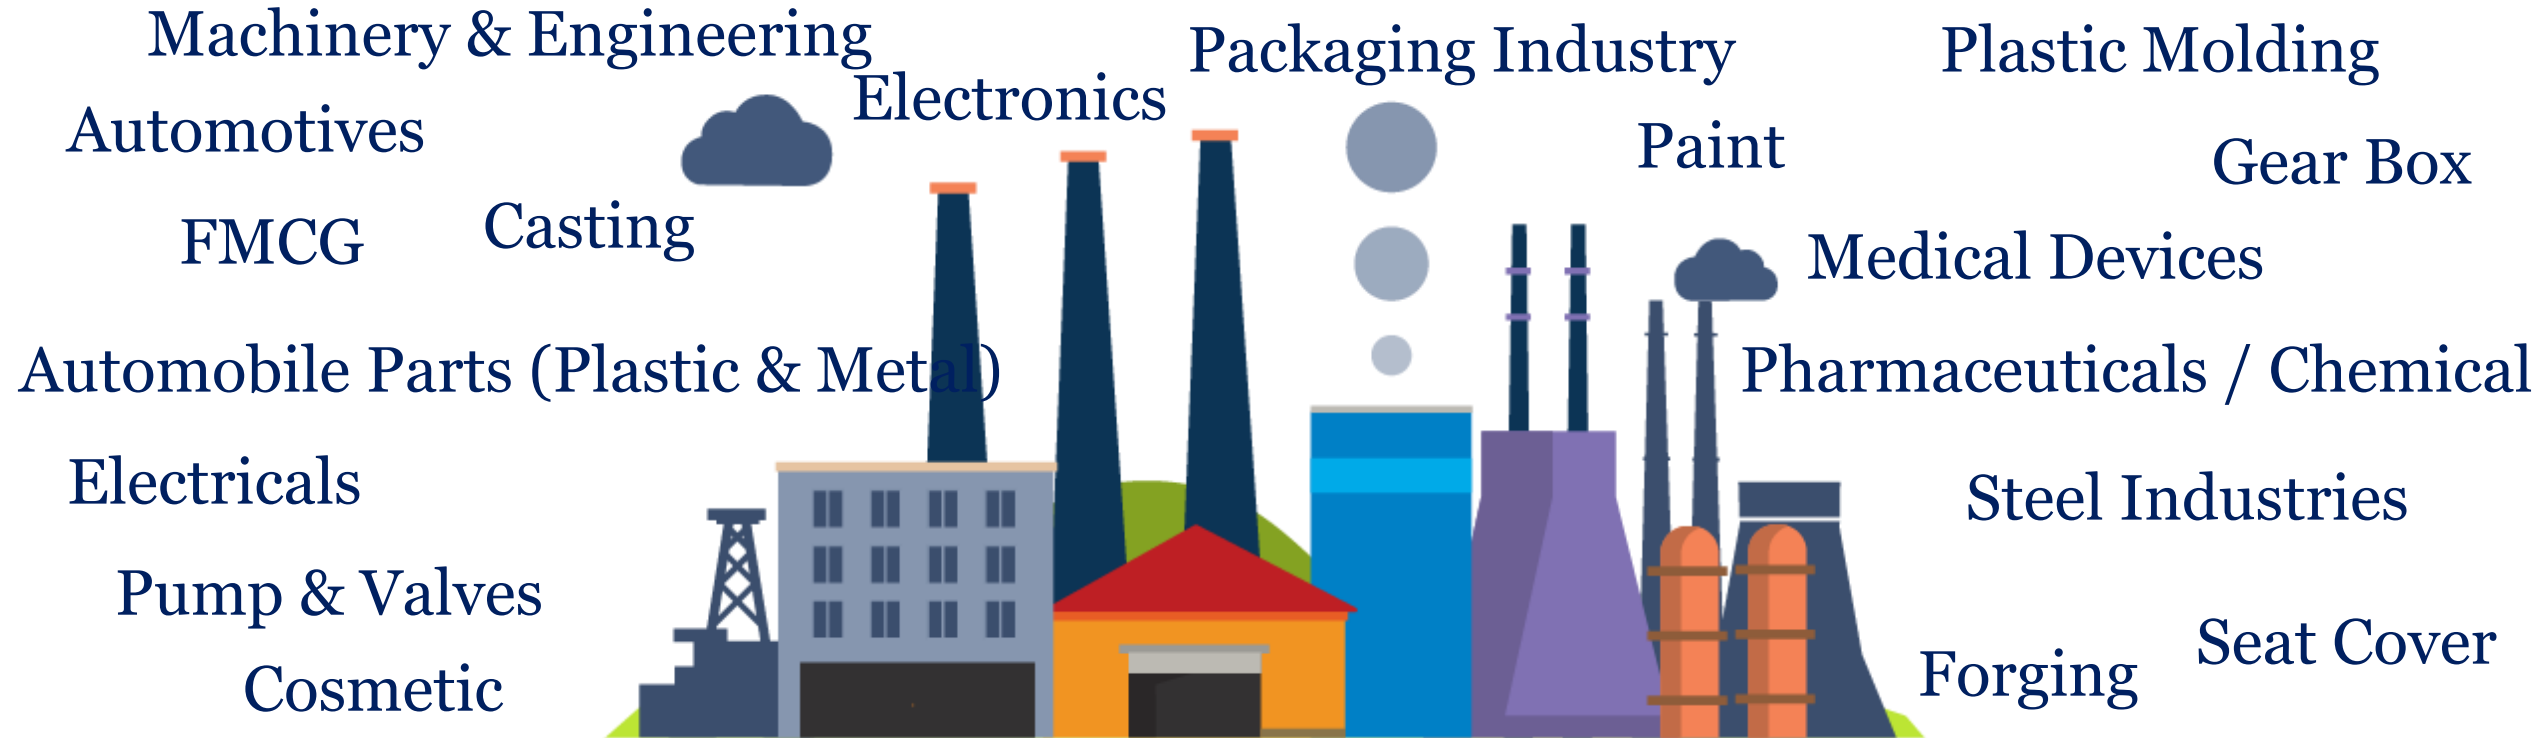

"To elevate quality of life across humanity despite diversity."

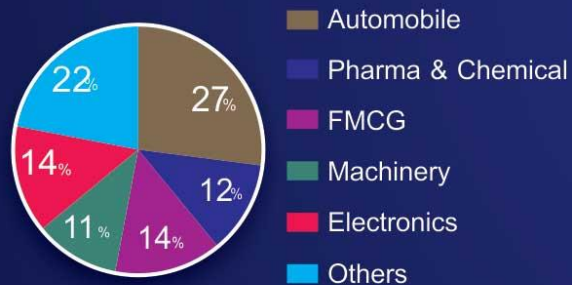

Mission

"To provide our client with optimized solution which gives great values to the business thus improving our stake holders quality of life."

Tick Softwares: Unique Production ERP with Tally Integration

An organization's ERP system plays a crucial role in shaping the company's growth. Not only streamlines the business process but also helps to achieve efficiency, speed, and accuracy. Today most of small and mid-sized businesses do their work on tally software for accounting parameters. But their operation activities are using pen and paper or excel-based processes which make them inefficient and also deliver an final. Tick Software Limited, headquartered in Delhi, help small and mid-sized businesses replace pen and paper or excel based working with a centralized digital business platform that is cost-effective and affordable for any SME's.

Comprehensive Inventory Management Features

TICK has production ERP with Tally Integration software, its centralized digital business platform and integration with all departments like sales, purchase, production, quality, stock, and account. The company's important features include: Sales & Inventory Management, Production Management, Procurement Management, Sales Management, Material Requirement Planning (MRP), Quality Control, Approval System, barcode module, Job Work Management, Tally Integration, multi dashboard, MIS Reports and much more. Additionally, every quarter the company shares the knowledge document as well as upgrade version on YouTube video to the existing clients for updates in technology.

Furthermore, TICK provides powerful inventory management features to help the businesses to manage multiple warehouses, track shipments, automatically reorder products, and stock transfer to locations. Following this, TICK has a client in Ludhiana who is having a turnover exceeding INR 400 Crores. They were earlier using in-house developed ERP, and for technical support they had two IT managers costing more than 1.25 lacs per month. The company replaced their home-developed ERP with Tick product which cost them less than INR 2 lakhs. They saved money in two counts - firstly, they saved in manpower cost in just 2 months. Secondly by using the ready-made software they could get certain additional features too. With such efficient, TICK has more than 1000 installations which itself a success story. And the company has also won Best SME's manufacturing ERP software for SME's Industries in 2016.

Founded in 2015, TICK was set up by a brilliant team of NIT-CA, MCA Graduates and MBA who took after partner development. TICK provides the finest combination for any SME as the company offers production ERP which can be integrated with any accounting software like Tally and Busy. This way TICK has a great opportunity to cater this high potential area. Moreover, TICK is being sold through partners and employees in partnership with all technical and product support in process of enhancing partners' networks across the nation. However in near future, the company will cater foreign market on cloud version and by 2020 TICK will be able to offer its services in European Market too.

Customer Testimonials

“TSL is a company of high repute with a skilled and professional core team, our experience with them to date has been a joy ride with on time assistance and customer support. Their product line and IT solutions are state of the art and highly competitive in terms of pricing, the variety of options to suit your specific business needs makes the entire experience even better, would definitely recommend them for all small and medium size enterprises”

**Mr. Madhav Rajgarhia, Chief Executive Officer,
Rajgarhia Group of Enterprises, Faridabad**

"We are using TICK software since April 2015. The after sales support by TICK support team is commendable and we appreciate them for their support."

Mr. Gokul Deori, Executive Officer, Parker PCP Auto Components Pvt. Ltd. , Bhiwadi

Parker PCP Auto Components Pvt. Ltd.

Customer Testimonials

“The Concept of the Software is Very Good and very well prepared To Undergo Or Track the Manufacturing Process and has all the Flexibility in Working and Planning for the Production. The another thing is the interface on which you could work that could make your software from Competitive. There are problems when working in two platforms of OS, if able to make a change that it would be great. There's a suggestion that if you prepare self help TAB in the software that many software provide that would be good and Online Support. And elsewhere its Good your Telephonic Support is the Best One, Customer Relationship is Good Services up to mark.”

**Mr. Divyesh R. Pithwa, Chief Executive Officer, V. K.
Fabricators, Mumbai**

Customer Testimonials

“Tick Software is extremely versatile. It is capable of handling almost any type of job-shop product. When it comes to the overall applicability, it is very robust. Filled with unique features and modules and it is very easy to navigate around the software”

Shri Anurag Goel, Director, Rama Bhoj Industries, Kiratpur
